

Facebook Activity: Manufacturing Airplanes

There are many different styles and types of airplanes. Some carry passengers and others carry cargo. Some airplanes are used by the military. In this activity, you will make your own airplane out of an 8 ½ x 11 sheet of paper. Once you have made your plane, decorate it. Be creative. When you are done designing your airplane, see how far it flies. Does it fly straight or does it turn to the right or left?
